Worksheet - Activity 2: Process Module Architecture

1. Problem statement

Write one sentence containing the affected product or process, the observed deviation, the relevant time or lot window, and the measurable impact.

.....

.....

2. Facts and assumptions

Item	Fact, assumption or inference?	Evidence source	Confidence
1			
2			
3			
4			
5			

3. Process or device map

Stage / structure	Intended output	Critical input	Control / metric	Failure consequence
1				
2				
3				
4				
5				

4. Competing mechanisms

Mechanism	Supporting evidence	Contradicting evidence	Discriminating check
A			
B			
C			

5. Decision and follow-up

Current conclusion:

.....

Immediate containment:

.....

Next verification:

.....

Owner / due date / effectiveness measure:

.....

6. Deliverable check

Required output: Process architecture map with module boundaries, control gates and two feedback loops.
